

Chief Scrutineer's Bulletin - #4 2017

Attention Team Managers

Item 9 in the **Team Manager Scrutineering Check List** asks that every rider has done a Roll Over Test. See the video on the Team Manager page. It is far better that riders experience this under controlled conditions before it happens on the track. It is like a plane pilot in a flight simulator. An actual race time incident will then be less traumatic. Riders will also gain confidence that their vehicle will protect them. They can practice not letting go of their steering handles during an incident. They will also find out whether or not they have done their seat belt harness up properly.
